

Ed Vones aka Mark first got in to the sounds of the rave scene in 1991 after listening to a friend's tape & being captivated, a love was born.

Early influences were the likes of TopBuzz, Ratpack & the Prodigy amongst others. With the music diverging through the 90's DJ's like Clarkee, Scorpio, & the Producer began to influence more & in 95 the urge to have a go at mixing became too much & a set of turntables were bought.

Often found in the basement at the legendary Diehard in Leicester or in the Techno rooms of other events listening to the harder beats pumping through the speakers the birth of his daughter saw him attending less events & the mixing slowly being put on the back burner. With only the occasional opportunity to mix he started spinning & enjoying the sounds of his brothers Hard house records before stopping completely for a good few years.

In 2017 the urge to just spin some tunes became too much & the turntables came out again rolling to the beats of hard house, after watching DJ's streaming the plunge in to the realm of digital DJ'ing was taken & a controller was purchased & the love affair with spinning repetitive beats continues.
